Experience

SmartVault Cloud document management
Software Developer

2014 - 2018

Product Team

Part of a team of developers practicing Agile/SCRUM methodology with 2 week sprints and monthly releases

- Building features / prototypes according to specification documents
- Porting legacy ASP.NET/C# client functionality into SmartVault's recently developed AngularJS client
- Building customer facing UI for SmartVaults Windows Desktop client (C#/WinForms) and Javascript web client (AngularJS)
- Optimized/re-worked several SmartVault application workflows including SV's Windows Desktop client "Send to Support", "Simple-View" files and folders view (AngularJS), and "Seasonal user licenses"
- Introduced several SmartVault features including a special "Services-User" user type, custom portal branding, and PDF encryption
- Increased SV's AngularJS client unit test coverage from approx. 30 - 90% via javascript testing using JasmineJS/Karma

Triage Team

Responsible for performing root cause analysis on production issues. Primarily interfacing with IT/Ops, support, third-party engineering teams and creating internal tools (C#) to remedy issues on the back-end.

- Significantly decreased SmartVault's triage queue by introducing improved processes and identifying defect trends to eliminate common customer issues
- Maintained/extended SmartVault's internal Publication Tool; a program (C#) consisting of commands used to perform back-end tasks
- Facilitated the transfer of triage duties to an offshore team of developers in India
